# RAJALAKSHMI INSTITUTE OF TECHNOLOGY DEPARTMENT OF TRAINING AND PLACEMENT WIPRO TALENT NEXT JAVA TRAINING (06.02.2023 TO 11.02.2023) Logic Building Hour (LBH) Plan

**Background:** Improving logic building skill is an important aspect in a programmer's journey. This training program is designed to nurture this skill in beginners. Logic building skill can be improved only by regular and focused practice.

#### What is Logic Building Hour (LBH)?

Logic Building Hour (LBH) is a dedicated 1 to 1.5 hours per day, when the students are expected to work on logic building exercises. The students are advised to choose any 1.5 hours' slot per day as per their convenience.

#### Should the students start Logic Building Hour (LBH) from day-1 of the learning?

No. For the initial 2 to 3 days, the students should focus on understanding the fundamentals of the programming language. It is expected that logic building practice must start from day-3 or day-4.

Below is a suggested day-wise plan to be followed for the Logic Building Hour (LBH)

**Suggested Timing:** 4.30 PM to 6:00 PM (or any slot convenient to the student)

#### Objective of Day1 and Day2: Learn the basics of the programming language

During the first two days of PBL, the students should have learnt the fundamentals of programming language and should be comfortable with the basic programming constructs.

- conditional statements
- looping constructs
- data types

#### 06-02-2023

# By the end of Day2:Students should be able to demonstrate their understanding of 'conditions' and 'loops' by being able to write the below programs

Programs to demonstrate learner's understanding of "Conditional statements"

- Write a program to accept a number N and print whether it is positive, negative or zero
- Write a program to accept two numbers and print the greater value of the two
- Write a program to accept a number N and print whether the number is EVEN or ODD
- Write a program to accept two numbers and print whether their sum is EVEN or ODD

Programs to demonstrate learner's understanding of "Looping constructs"

- Write a program to print all numbers from 1 to 100 i.e. 1 2 3 4 5 6 7 . . . . 98 99 100
- Write a program to print alternate numbers starting from 1 to 99 i.e. 1 3 5 7 9 11 13 . . . 95 97 99
- Write a program to print alternate numbers starting from 0 to 100 i.e. 0 2 4 6 8 10 12 . . . 96 98 100
- Write a program to print all numbers backwards from 100 to 0 i.e. 100 99 98 97 96 . . . 4 3 2 1 0
- Write a program to print numbers backwards from 100 to 1 by skipping 2 numbers i.e. 100 97 94 91 88 85 82 79. . . 22 19 16 13 10 7 4 1

Students who have NOT been able to complete the above mentioned programs on day-2, <u>MUST</u> complete them on day-3.

Objective of Day3: Learn the use of division / and mod % operations to solve problems

Solve the below questions using the respective IDE (Eclipse for Java, Visual studio for C#, vi for C/C++)

#### Is Even?

Write a function to find whether the given input number is Even.

If the given number is even, the function should return 2 else it should return 1.

**Note:** The number passed to the function can be negative, positive or zero. Zero should be treated as Even.

#### Is Odd?

Write a function to find whether the given input number is Odd.

If the given number is odd, the function should return 2 else it should return 1.

**Note:** The number passed to the function can be negative, positive or zero. Zero should NOT be treated as odd.

### • Return last digit of the given number

Write a function that returns the last digit of the given number.

Last digit is being referred to the least significant digit i.e. the digit in the ones (units) place in the given number.

The last digit should be returned as a positive

number. for example,

if the given number is 197, the last

digit is 7 if the given number is -197,

the last digit is 7

#### Return second last digit of the given number

Write a function that returns the second last digit of the given number.

Second last digit is being referred to the digit in the tens place in the given number. for example,

if the given number is 197, the second last digit is 9

**Note1** - The second last digit should be returned as a positive number.

i.e. if the given number is -197, the second last digit is 9

**Note2 -** If the given number is a single digit number, then the second last digit does not exist. In such cases, the function should return -1.

i.e. if the given number is 5, the second last digit should be returned as -1

#### Sum of last digits of two given numbers

Rohit wants to add the last digits of two given

numbers. For example,

If the given numbers are 267 and 154, the output

should be 11. Below is the explanation -

Last digit of the

267 is 7 Last

digit of the 154 is

4 Sum of 7 and 4

= 11

Write a program to help Rohit achieve this for any given two numbers. The prototype of the method should be -

#### 07-02-2023

# Logic Building Hour (LBH)

int addLastDigits(int input1, int input2);

where input1 and input2 denote the two numbers whose last digits are to be added.

Note: The sign of the input numbers should be

ignored. i.e.

if the input numbers are 267 and 154, the sum of last two digits should be 11 if the input numbers are 267 and -154, the sum of last two digits should be 11 if the input numbers are -267 and 154, the sum of last two digits should be 11 if the input numbers are -267 and -154, the sum of last two digits should be 11

#### Objective of Day4: Learn the usage of the mettl tool

Mettl is an automated evaluation tool for coding tests. Students are advised to read the "Mettl User Guide" to learn the usage of the tool..

#### Solve the below questions on mettl

**Note** – These are same questions as day-3 questions. The focus on day-4 is to learn the usage of mettl.

Question Title	Mettl Practice Test Link
Is Even?	https://tests.mettl.com/authenticateKey/2bd025dc
Is Odd?	https://tests.mettl.com/authenticateKey/dbdac2a9
Return last digit of the given number	https://tests.mettl.com/authenticateKey/454f012b
Return second last digit of given number	https://tests.mettl.com/authenticateKey/9f87004e
Sum of last digits of two given numbers	https://tests.mettl.com/authenticateKey/783a1fcf

Objective of Day5: Learn the use of division / and mod % operations to solve problems		
Question Title	Mettl Practice Test Link	
Is N an exact multiple of M?	https://tests.mettl.com/authenticateKey/36c4e	
Of given 5 numbers, how many are even?	https://tests.mettl.com/authenticateKey/8edbe	
Of given 5 numbers, how many are odd?	https://tests.mettl.com/authenticateKey/67147	
Of 5 numbers, how many are even or odd?	https://tests.mettl.com/authenticateKey/60763	

#### 08-02-2023

**Logic building approach:** Read the document "An Approach to Logic Building" (mainly section-B) available in the "Logic Building" link in PBLApp. It suggests a "Divide-and-Conquer" approach to be followed by beginners while developing logic. Students are expected to read the document carefully and follow the approach while solving all subsequent logic building problems.

## Objective of Day6: Learn to solve math based number problems (will require loops and maths)

Question Title	Mettl Practice Test Link
Is Prime?	https://tests.mettl.com/authenticateKey/b1efaa3d
Factorial of a number	https://tests.mettl.com/authenticateKey/8c1f2ae
Nth Fibonacci	https://tests.mettl.com/authenticateKey/f390cadf
Nth Prime	https://tests.mettl.com/authenticateKey/34fdaa41

	Objective of Day7: Learn to solve math based number problems (will require loops and maths)			
	Question Title	Mettl Practice Test Link		
	Number of Primes in a specified range			
	All Digits Count	https://tests.mettl.com/authenticateKey/ed6b4c		
	Unique Digits Count	https://tests.mettl.com/authenticateKey/b7aac4		
	Non-Repeated Digits' Count	https://tests.mettl.com/authenticateKey/e46500		
09-02-2023	Tion risposates 2 igns count			
03-02-2023	Objective of Day8: Learn to solve number based problems (will require loops)			
	Question Title	Mettl Practice Test Link		
	digitSum : sum of all digits in N	https://tests.mettl.com/authenticateKey/ab1d60cc		
	digitSum even: sum of even digits in N	https://tests.mettl.com/authenticateKey/b55d1714		
	digitSum odd: sum of odd digits in N	https://tests.mettl.com/authenticateKey/738fdee0		
	digitSum opt: sum of even or odd digits	https://tests.mettl.com/authenticateKey/a05abbcf		
	Objective of Day9: Learn to solve number based problems			
	Question Title	Mettl Practice Test Link		
	Is Palindrome Number?	https://tests.mettl.com/authenticateKey/28c41d9d		
	Is Palindrome Possible?	https://tests.mettl.com/authenticateKey/f4fdb02		
	Create PIN using alpha, beta, gamma	https://tests.mettl.com/authenticateKey/be582d9f		
10-02-2023	Weight of a hill pattern	https://tests.mettl.com/authenticateKey/d612c0e6		
10 02 2020				
	Objective of Day10: Learn to solve number & string based problems			
	Question Title	Mettl Practice Test Link		
	l	1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1		
	Return second word in Uppercase	https://tests.mettl.com/authenticateKey/4a72723f		
	is Palindrome (string)	https://tests.mettl.com/authenticateKey/ffe8042		
	is Palindrome (string) weight of string	https://tests.mettl.com/authenticateKey/ffe8042 https://tests.mettl.com/authenticateKey/387952fc
